ADDING MY PINOY COIN

We recommend using Trust wallet, which can be downloaded from your App store. You can use other wallets you need to make sure they support BEP-20 tokens.

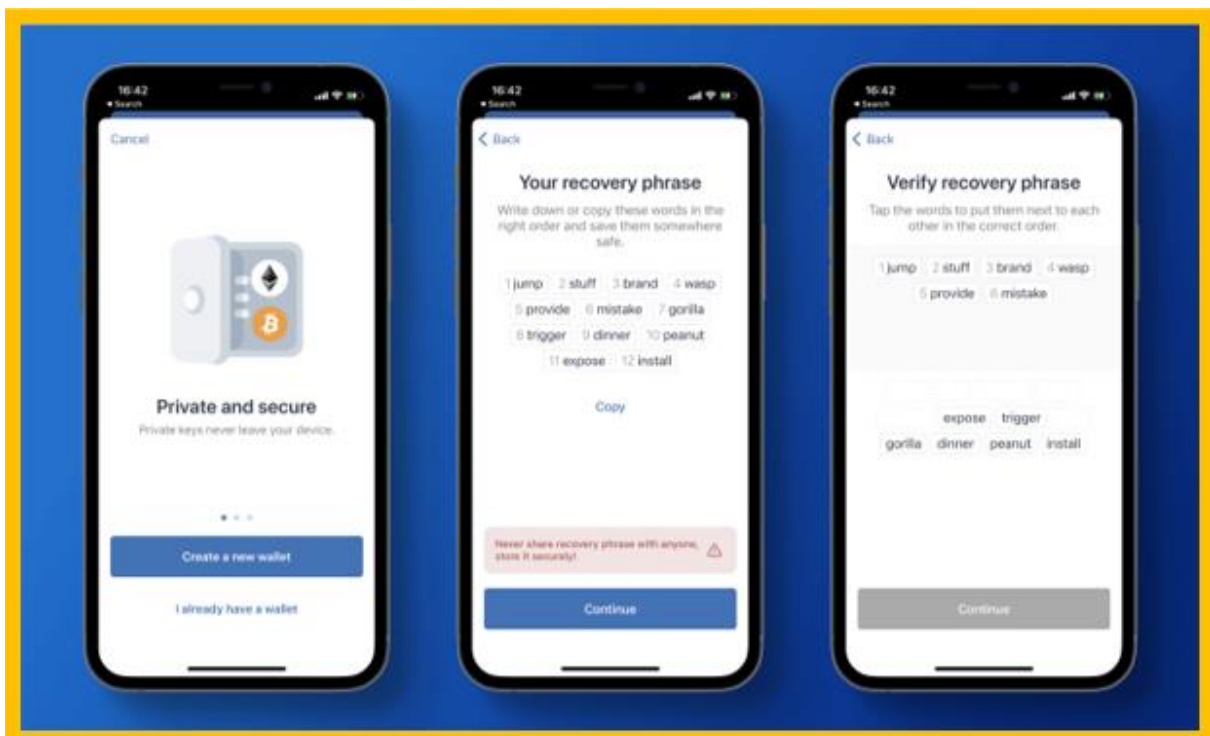

Open the app and click create a new wallet, follow the steps below to make a wallet and add My Pinoy Coin.

We advise you to store the recovery phrase in two places. Your recovery phrase is like a password that can not be reset so keep it safe.

1 ► Recovery Phrase — Your Pass

- For easy usage, Trust Wallet encrypts all assets' private keys to create one master private key, which is then run through an algorithm to generate a unique 12-word phrase known as the **Recovery Phrase**.
- Upon signing up, you will be assigned a wallet that you must back up with your recovery phrase immediately.

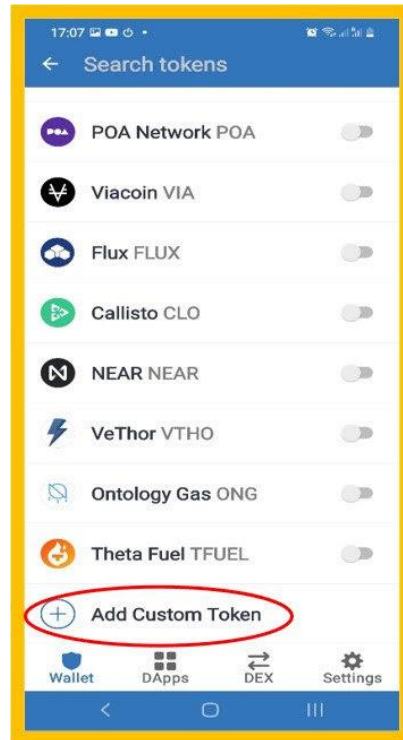

2 ► Once you have created a wallet you need to add My Pinoy Coin.

3 ► First, click the toggle in the top right.

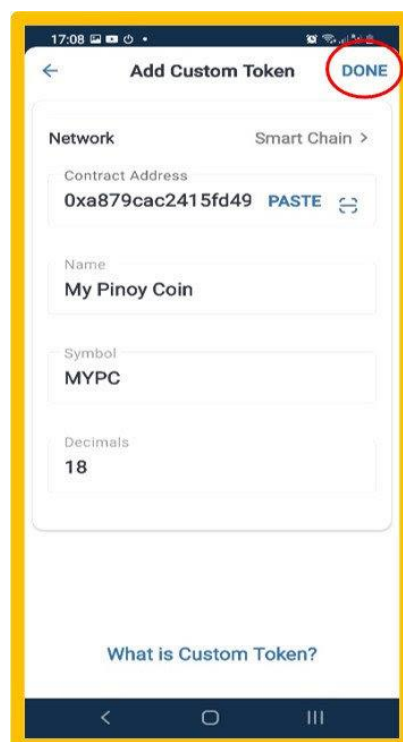

4 ▶ Scroll to the bottom and press "Add Custom Token".

5 ▶ *****Change network to Smart Chain*****

- ▶ Paste our address: 0xA879cAC2415fD494Cb137cAEA83c984302a516fB
- ▶ It is very important you have SMART CHAIN as network
- ▶ Confirm it looks like below and click "Done".

6 ▶ You have now added My Pinoy Coin to your wallet.

****Please double check you see BEP20 when My Pinoy Coin is added.****
